

for the hospitality industry:

Powder coated menu cover

A sophisticated menu cover combining refined design with outstanding material properties. Based on high-tech aluminum composite panel finished with a metallic powder coating, this menu cover has all features to astonish your guests. The scratch-resistant surface with a subtle grain structure feels comfortable and keeps the menu cover free of greasy fingerprints.

Diamond engraving can be applied, exposing the silver-colored aluminum beneath the metallic powder coated surface.

Fully customisable and personalisable in regard to size, color, securing method and engraving.

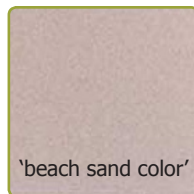

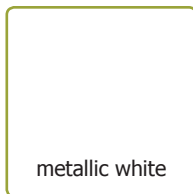

Material

- Aluminum composite panel.
- Metallic powder coating (several colors available).

Types and colors

- Book screw, elastic cord or brad fasteners.
- Available in metallic anthracite, metallic white and metallic 'beach sand color'.
